## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Response to Amendment***

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Griffith et al.(U.S.Pat.4,629,844) in view of Takikawa et al.(U.S.Pat.5,386,102) and Okumura et al.(U.S.Pat.5,368,062). Griffith discloses an induction heater having an alternating current conductor that shows many features of the claimed invention but fails to show explicitly a timer, a temperature controller, metal pipes or valves. Takikawa discloses a cooker that shows a timer and a heat controller. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use a timer and heat controller as taught by Takikawa so as to cook different foods with the heater. Okumura discloses a gas supplying system and apparatus that shows using metal pipe sections with input and output valves. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use metal pipes for corrosive fluid and valves to control fluid flow.

***Allowable Subject Matter***

Claims 5-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Boiko, Ohkubo, Kagan, Griffith'402 and Frank are cited to show structure similar to the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel L. Robinson whose telephone number is 571-272-4788. The examiner can normally be reached on m-f 5:30-2:30.
